PROFESSIONAL SUMMARY

Product Designer with **+3 years of experience** working across enterprise software, **B2B/B2C products**, EdTech, and consumer-facing platforms. Experienced in problem discovery, complex **workflow design**,user research, and translating business processes and requirements into usable product experiences.
My work often sits between product design and **business/process analysis**, including user and stakeholder interviews, requirements analysis, **BPMN-based** process modeling, and collaboration on **BRD/SRS documentation**. Strongest in complex systems where understanding the underlying process is as important as designing the interface.

EXPERIENCE

Product Designer

May 2025 – Present
Isfahan ,Iran - Onsite

Nosaz Mohaseb - full time

Enterprise software company building municipal and organizational digital systems.

- Redesigned a core urban-planning workflow after interviews, field observation, support feedback, and **process analysis** revealed a mismatch between the system structure and the real operational process. The redesigned workflow was implemented and reduced repetitive work reported by the support team.
- Initiated and developed a **Task-Based UX Pattern Library** after identifying that reusable UI components alone could not solve behavioral inconsistencies across products. The framework is now used across the Commission, Real Estate, and Citizen Portal products.
- Owned the complete UX/UI design of a comprehensive Commission Management System, covering forms, meetings, decisions, cases, documents, workspaces, minutes, and multiple workflow states.
- Led the end-to-end UX/UI design of a Real Estate & Property Management System, while also contributing to requirements and process analysis for property registration and appraisal and **preparing analysis documentation**.
- Contributed to the redesign of a **Citizen Services Portal**, working on both citizen-facing and administrative experiences and collaborating on business and UX analysis.
- Designed experiences for Ravin, an **AI support and training assistant**, contributing to research and the interaction experience beyond the chat interface.
- Supported product analysis through **user/stakeholder interviews**, **BRD/SRS preparation**, **BPMN/BPMS modeling**, **domain research**, usability evaluation, and close collaboration with Product, Engineering, QA, and Support.

UI/UX Designer

Apr 2025
Oct 2025 – Feb 2026
Isfahan ,Iran - Onsite
Isfahan ,Iran - Remote

Danajou - full time - Part-time

EdTech platform enabling verified experts to publish courses, webinars, and events.

- Redesigned registration and content-publishing workflows, including long multi-session course creation and content upload.
- Restructured forms and flow sequencing to **reduce ambiguity** for creators handling large amounts of course content.
- Designed question-submission and educator-response experiences for a separate K–12 educational product.
- Conducted **usability testing** on accessible user groups and iterated designs based on findings.

UI/UX Designer

Nov 2024 – Jul 2025 | Tehran ,Iran - Remote

OPAL Shopping Center - Part-time

- Led the redesign of the main customer-facing website across stores, restaurants, events, entertainment, services, navigation, news, profile, and other core sections.
- Worked across information architecture, user flows, wireframes, high-fidelity UI, and interactive prototypes.
- Built a reusable **UI Library** to create consistency across the redesigned experience.

Product Designer

Aug 2024 – Mar 2025 | Isfahan ,Iran - Onsite

Amlakdaran - full time

Early-stage startup covering property listings, construction-material commerce, and building services.

- Conducted stakeholder and user interviews and extensive competitive analysis to identify usability and product issues.
- Redesigned property search and filtering to improve the weak property-discovery experience; the solution was implemented and tested internally.
- Designed role-based panels for real-estate consultants, agencies, and property developers with different access levels.
- Established a reusable UI Library as a common visual foundation for the emerging product.

CORE SKILLS

Product & UIUX :Interaction Design · Information Architecture · Complex Workflow Design · Enterprise UX · B2B UX · UI Design · Advanced Prototyping · Design Systems · UX Patterns

Research & Analysis: User Interviews · Stakeholder Interviews · Contextual Inquiry · Usability Testing · Competitive Analysis · Workflow Analysis · Domain Research · Concept Mapping · Research Synthesis

Business & Process: Problem Framing · Requirements Analysis · Business Process Analysis · BPMN/BPMS · BRD/SRS Documentation

Tools: Figma · FigJam · Jira · Azure DevOps · Google Docs · AI Tools · Camunda

COURSE & EDUCATION

Product Design Bootcamp Show Credential

Rahnema College- **Issued Dec 2024**

B.Sc. In Anesthesia

Kashan University Of Medical Sciences | 2020–2024

LANGUAGES

English- Upper Intermediate
